

# ANDREW J. THOMPSON

TECHNOLOGY ANALYST | APPLICATION DEVELOPMENT | IT OPERATIONS

Mooresville, NC | (704) 351-4995 | aj.thompson8888@gmail.com | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Technology generalist combining full-stack application development with 15+ years of technical troubleshooting, team leadership, and process improvement. Builds database-driven tools with JavaScript, TypeScript, SQL, Node.js, React, PostgreSQL, and REST APIs; diagnoses issues across Windows, applications, services, networks, and data; and documents repeatable solutions. Uses AI coding assistants for prototyping, debugging, testing, and documentation while independently validating results and retaining ownership of technical decisions.

## CORE SKILLS

**Development and Data:** TypeScript, JavaScript, SQL, Node.js, Express, React, PostgreSQL, Prisma, REST APIs, HTML/CSS, basic Python

**Technology Operations:** Windows 10/11, Microsoft Office and Outlook, desktop/laptop setup, software installation, hardware and peripheral troubleshooting, access-support concepts

**Automation and Quality:** AI-assisted prototyping, workflow improvement, system integration, data validation, Postman, automated testing, GitHub Actions, technical documentation

**Platforms and Networking:** Docker, Docker Compose, WSL, Git/GitHub, Vercel, command line, TCP/IP fundamentals, Wi-Fi and Ethernet troubleshooting

## TECHNICAL EXPERIENCE

### ReliefRoot | Backend and Full Stack Developer

2026-Present

*Independent product development | TypeScript, Express, PostgreSQL, Prisma, Docker*

- Develop a modular internal-style platform with versioned APIs, service-layer separation, reusable configuration, and normalized relational data supporting organizations, users, products, and analytics workflows.
- Build and troubleshoot data flows across HTTP requests, application services, Prisma queries, PostgreSQL state, authentication, validation, and persistent sessions using logs, Postman, curl, and targeted tests.
- Standardize setup, migrations, API testing, and verification; automate build and regression checks with GitHub Actions; and maintain documentation that supports repeatable operations and onboarding.
- Diagnose Windows, WSL, Docker, localhost networking, port-binding, configuration, and database issues, then verify corrections through integration tests and documented reproduction steps.

### Selected Application Projects

2024-Present

- FlowBoard: Built a typed React, TypeScript, and Express task-management application; standardized ticket data, resolved API and port conflicts, and restored clean production build and lint validation.
- ShadowStack and Platform API: Deployed a responsive portfolio with a secured serverless contact workflow and implemented PostgreSQL-backed authentication services using JWT, bcrypt, middleware, and Postman verification.

## PROFESSIONAL EXPERIENCE

### HighLife | Sales Associate

Apr 2026-Present

- Translate technical product and laboratory data into clear guidance, recognize patterns in customer feedback, resolve concerns, and maintain accurate policy-compliant service in a high-volume environment.

### Whataburger | Shift Leader

Sep 2025-Jun 2026

- Promoted to coordinate daily operations, train employees, prioritize requests, resolve escalations, and maintain reliable workflows across multiple workstations under time pressure.

### Randy Marion Chevrolet Buick Cadillac | Parts Counter Sales

Feb 2022-Aug 2025

- Researched technical specifications, coordinated issue resolution across departments, and improved order-processing time by approximately 20% through workflow improvements.

### Advance Auto Parts | Store Manager, Assistant Manager, Sales Professional

2011-2022

- Led and trained teams of 15+ employees, handled technical and customer escalations, maintained operational systems, analyzed performance data, and implemented process improvements with district leadership.

## EDUCATION AND CREDENTIALS

University of North Carolina at Charlotte | Full Stack Software Development Bootcamp, May 2025

Brevard Community College | Associate of Arts, General Studies, Dec 2012 | NASCAR Technical Institute | Automotive Technology Diploma, Feb 2009

**Credentials:** Full Stack Web Development Certificate | EPA 609 Certification | Alpha Beta Kappa | Phi Theta Kappa
